FLASHCARD GENERATION MODULE

The screenshot displays the 'Flashcard Generation Module' of the 'AI-Powered Adaptive Learning Platform'. The interface includes a title 'Enhanced Interactive Flashcard Generator' and a description: 'Generate and practice with interactive flashcards from any text content, including PDF and Word documents!'. Navigation tabs include 'Generate Flashcards', 'Practice Quiz', and 'Import/Export'. The 'Generate Flashcards' tab is selected. Under the heading 'Generate Flashcards from Multiple Sources', users can 'Choose input method:' from a dropdown menu (currently set to 'Paste Text'). A large text area is provided for users to 'Paste your text content here:', with a placeholder instruction: 'Enter the text you want to create flashcards from...'. The interface is running on a local host at port 5501.

GENERATION OF FLASHCARD

Generate Flashcards from Multiple Sources

Choose input method:
Paste Text

Paste your text content here:
Advanced Prompt Engineering is the strategic design of inputs (prompts) to guide AI models toward more accurate, useful, and creative outputs. It goes beyond basic questions or commands and incorporates structure, context, logic, and constraints.
